ONGOING ACTIVITIES:

- *Gold King Mine - Colorado Update #6*
 - ATSDR continues to provide input into the EPA and SJBHD plan for interpreting individual results from private well sampling as well as the plan for conducting additional sampling.
 - EPA has requested continued technical assistance from ATSDR (Chief Medical Officer) in crafting messages regarding individual results.
 - The City of Durango/EPA/Unified Command meeting planned for Aug 15 was postponed; no new meeting date has been set.
 - SJBHD requested that ATSDR provide some general public health information that could be used in the above mentioned public meeting, once it occurs. ATSDR is preparing talking points and will provide to SJBHD in advance of the public meeting.
 - ATSDR continues to coordinate with EPA and the Unified Command to gather the additional sampling results and background information as they become available. ATSDR scientists continue to informally review (until a formal request is received) this data to better understand any health risks associated with contaminant exposures.
 - R8 deployed staff arrived back in Denver on August 15. He will continue to support the response from the Denver EOC and the ATSDR R8 Regional Office. R9 Health Educator deployed to the Farmington, NM ICP/Navajo Nation on Aug 15.
